In acknowledging the receipt of your letter No. G. 13735/Med 127-26-44, dated the 14th June 1928 forwarding a copy of a letter No B 3-691/27-28, dated the 26th May 1928, from the Municipal Commissioner, City Municipal Council, Bangalore, asking for information as regards the organisation and working of a permanent Leprosy Fund in the State, I have the honour to state that the requisite information is contained in the last para of my letter No. C. 899, dated the 28th April 1928. I take this opportunity to detail below, for the information of Government and for communication to the City Municipal Council, the work so far done in this direction:-

1. Training of Medical Officers in the diagnosis and treatment of Leprosy.

(a) No. of Officers trained at Calcutta.	...	3
(b) No. of Officers trained at the Local Asylum.		3
	Total...	6

2. Leprosy Survey.- 37 villages have until now been surveyed, chiefly in Malavalli and Mandya Taluks of the Mysore District resulting in the detection of 218 lepers in various stages of the disease Further survey work is also in progress in the Shimoga District. As a result of this survey, the Leper Act has been extended to Mandya and Malavalli Taluks, and arrangements have been made for the suitable treatment of these lepers. It is intended to eventually carry on this survey work throughout the State and thus arrive at an accurate figure about the incidence of leprosy in the State.

3. Appointment of Leper Inspectors.- As a direct result of

result of this, a large number of lepers was sent by the Leper Inspect Bangalore, to the local Asylum, and as many as 126 received treatment at the above institution during the year 1927. The result of the tre ment being that 8 percent of the treated became negative both clinically as well as bacteriologically and 31 per cent showed various stages of improvement.

4. As the present accommodation in the Leper Asylum was found insufficient to house the number of lepers that are being sent from time to time by the Leper Inspector, Bangalore, it was found necessary to provide for more accommodation. Plans and estimates which were called for have since been received.

5. "Truths about Leprosy" were translated into different vernacular languages and distributed.

6. Lantern slides showing the various stages of the disease, the mode of the spread of the disease and the beneficial results of treatment taken from actual cases have also been prepared.

7. Arrangements have been made for opening a Leper Out-patient Di pensary at Bangalore.

The present survey has brought to light that there are quite a large number of lepers in the State still undetected. The survey of Bachenahalli has disclosed that the disease is already in its third generation at the place. Modern treatment as gauged from outside results and from the results obtained at the local Asylum has placed the problem of leprosy on a more hopeful basis, specially so, if cases are tackled in early stages.

With a view to stamp out leprosy, the British Empire Leprosy Relief Association have decided upon adopting a certain course of action. In consonance with their policy and in accordance with the orders of Government, a local Leprosy Relief Committee was formed. It was resolved at their meeting to train a number of medical men in the art of diagnosis and treatment of leprosy in the State and to create facilities for proper treatment.

The children of the poor leprous patients have to be separated from
